

# PRE-ASSEMBLED 1/3 HP Primary Plus Battery Backup Sump Pump System

Model No.  
DFK961

## Pre-assembled Protection:

- 2 Pumps - Primary and Backup
- 2 Dual Float Switches
- Backup from Power Outages

Primary Pump

**1/3 HP**

Pumping Capacity

**3720 GPH**

3100 GPH at 10' lift

Backup Pump Capacity

**2000 GPH**

1000 GPH at 10' lift

Primary Pump Construction

**Cast Iron/  
Cast Aluminum**

### The Basement Watchdog Big Combo Connect Benefits:

- **Pre-assembled** Basement Watchdog Combination sump pump system is easy to install
- Designed to provide both primary and battery backup pumping capabilities, giving you ultimate protection and peace of mind
- The primary pump will operate as long as it is receiving AC power
- The backup sump pump will begin pumping automatically if the power is interrupted, or more water is coming into the sump than the AC pump can handle
- The backup system has unique monitoring features that diagnose a problem and sound an alarm

## Key Features

### Battery Fluid Sensor

- Sensor measures battery fluid level
- When water is needed, the controller will sound an alarm
- The fluid sensor is designed for Basement Watchdog batteries, and it is not compatible with other brands of batteries

### Dual Float Switches

- Both Basement Watchdog pumps have two redundant floats on each switch
- Should one float fail to activate the pump, the second float takes over
- The result... four times the protection for added reliability

## Compatible Batteries (Sold Separately)

### Basement Watchdog Maintenance Free AGM Standby Battery

- No need to add battery fluid or distilled water
- Run our sump pump intermittently for days
- Last longer in standby operation

BW-27AGM

### Basement Watchdog Wet Cell Standby Batteries

- Run our sump pump intermittently for days
- Last longer in standby operation
- Accommodate the important battery fluid sensor

30HDC140S  
or BW-30F

24EP6 or  
BW-24F

## Installation

### Easy Installation

1. Cut discharge pipe and remove old unit
2. Position combination unit in sump pit and connect unit to discharge pipe with rubber union
3. Connect backup controller to the battery

System can fit in a small sump pit - 12" in Diameter x 14"
